About me

I am pursuing a PhD degree in Applied Mathematics. My research is centered around applying probability theory to solve problems in biology. I am particularly interested in how probability models can help understand biological processes and phenomena, for instance: genetic variation, population dynamics, and the spread of mutations.

I consider myself a well-read person, but I always look for challenges outside my comfort zone. I hold self-imposed high-quality standards in multiple dimensions of my life.

Scientific interests

- Mathematical biology: population genetics and evolution
- Coalescent and Branching Processes
- Random trees
- PDEs arising from probability and stochastic process

Technical Skills

- Github
- Python
- R (programming language)
- Java
- Android

Languages

- Spanish
- English
- Française

Work Experience

2024-2026	Software Developer	Fuente Tech (Republic of Singapore)
2024-2025	Part-time Lecturer in Advanced Probability	Universidad Nacional Autónoma de México (UNAM)
2020-2023	Teaching Assistant	Universidad Nacional Autónoma de México (UNAM)

Education

2023	Graduate studies in Mathematical Sciences	Universidad Nacional Autónoma de México (UNAM) Graduated with honors, 97/100 average score.
2020	Undergraduate studies in Mathematics	Universidad Nacional Autónoma de México (UNAM) Graduated with honors , 99/100 average score.

Professional Development

2023	Attended the Inaugural Event of the Mexican Network of Biology and Mathematics and the Probability Weekend	Instituto de Matemáticas UNAM Unidad Cuernavaca, Centro de Ciencias Genómicas UNAM
2024	Attended the 6th edition of the tri-annual conference on Stochastic Processes in Evolutionary Biology	Centre International de Rencontres Mathématiques, Marseille (France)
2025	Presentation at CUWB-IV: Frontiers in statistics and probability	IIMAS, UNAM
2025	Poster presentation at the 2nd editon of the Mexican Network of Biology and Mathematics	Centro Cultural Gómez Morín, Queretaro
2025	Poster presentation at Symposium on Probability and Stochastic Processes	Universidad de Sonora, Hermosillo
2026	Poster presentation at the XVII Latin American Congress of Probability and Mathematical Statistics	Montevideo, Uruguay
2026	Talk at the II French–Mexican Workshop in Probability	CIMAT, Guanajuato

Scientific communication

2021	Talk entitled "Matemáticas en contexto: Un vistazo a las aplicaciones del Álgebra y del cálculo."	Colegio de Bachilleres del Estado de Hidalgo
2026	Talk entitled "Las habladurías de π "	Pi Day celebration, mathematics festival in Tulancingo, Hidalgo

Certifications

2023	Basic Concepts for Gender Equality	Licencia
2023	Artificial Intelligence and Deep Learning with Python	Licencia
